

DIDSBURY PIONEER

VOL. XXXII. No. 17.

DIDSBURY, ALBERTA, THURSDAY, APRIL 25, 1935

\$2.00 per year. 5 cents a copy.

Silver Jubilee

Invitations are being sent out to all the rural schools in the district to join with the town in celebrating the silver jubilee of Their Majesties accession to the throne.

The children will meet at the C.P.R. grounds and will parade to the School grounds where patriotic exercises will be observed.

Ice cream will be served to the children and sports will be held after the exercises.

Concert in Aid of Cancer Fund

One of Didsbury's contributions to the Jubilee Cancer fund will take the form of a concert and dance which will be held on the evening of May 6th at the Opera House.

A splendid program by local talent has been arranged and after the concert a dance will be held with Halliday's orchestra supplying the music.

To attend this concert and dance will be a small way in which the people of Didsbury can help in a cause which is attracting the attention of the people of Canada at the present time and it is hoped that it will go over in a big way.

Evangelical Church Notes

The sermon subject next Sunday morning will be, "Our Ever Present Lord," and in the evening, "The Deep Things of God."

We extend a hearty invitation to all who are without a church home to worship with us.

Easter Cantata

The Easter Cantata, "Resurrection Light" by E. L. Ashford was well received Sunday night by a large congregation of Evangelical and United church members. The cantata was rendered by the choir of Knox church under the able direction of Mr. J. Boorman and was held in Zion Evangelical church with the Rev. H. J. Wood conducting the worship period.

The cantata introduced some very beautiful music with solo numbers being taken by Mrs. Boorman, Miss Dorothy Ranton, Miss Elsie Goertz, Miss Evelyn Liesemer, Miss Alice Pearson, Miss Ruth Liesemer and Mr. Jack Boorman. Two mixed and one male quartet were well rendered while the choruses were all well worthy of mention.

The cantata showed the results of much hard work and much credit is due Mr. Boorman for his untiring efforts as director and to Mrs. Boorman who devoted so much time as accompanist.

Garnet Grading Regulations to Go Into Effect

Definite information from Ottawa is to the effect that separate grading of Garnet wheat will be put into effect August 1, 1935, as originally provided by legislation. For some time it was thought that the new regulations would be postponed, due to the large quantity of mixtures of Garnet and Marquis types of wheat in Western country elevators. A delegation from the grain trade was in Ottawa and pointed out to the government that heavy losses would ensue to them if this old crop wheat came under the new regulations. This was the basis on which the suggestion for postponement of the new grading regulations was placed.

Celebrate Thirtieth Wedding Anniversary

Mr. and Mrs. John Allen quietly celebrated their 30th wedding anniversary at the home of their son, Mr. Thompson Allen, at Wetaskiwin on Friday, April 12th.

Mr. and Mrs. Allen were married in Philadelphia, U.S.A., April 12th 1885. Several years later they returned to the north of Ireland, where they resided for seven years and came from there to Didsbury in 1914.

We join their many friends in wishing them many more years of happy married life.

Slot Machines Must Go.

Few will weep over the fate of the merchants who have slot machines and for whom Mr. Howson sought to arouse sympathy in the legislature. These machines have been proscribed by law in Alberta for many years. Those who operated them, because some loophole in the law enabled legal counsel to come to their defence, can hardly claim to have been caught unaware. Sooner or later the law was bound to be made lawyer-proof. Presumably that is now being done and eventually thousands of nickels will be saved yearly to those who can ill afford to spend them on a long chance of getting something for nothing.

LOCAL & GENERAL

Mr. G. A. Wallace and family motored to Wildwood, Alberta for the holidays.

Mrs. Dave Edwards received word Sunday of the death of her father, Mr. John Acton, at Dundurn, Sask. Mrs. Edwards left on Tuesday to attend the funeral.

Miss Margaret Ranton, who spent a portion of her holidays at her home here, left Wednesday for Edmonton where she will spend the remainder of her vacation.

Mr. and Mrs. W. J. McCoy and Mrs. W. J. Hillyard motored to Edmonton on Monday. On their return they will be accompanied by Miss Jessie McCoy, who has been attending the University.

The young people of St. Cyprian's A.Y.P.A. were entertained at the home of Mr. Charles Pratt to a social evening Monday. There was a full attendance and the evening was greatly enjoyed.

Word has been received of the death of Mrs. Jessie Rowe at Calgary last Wednesday. Mrs. Rowe had been housekeeper for Mr. R. J. Burns for the past 16 years and was well known in this district.

Mr. J. V. Berscht has made a big improvement in the appearance of his store. He is kalsomining the walls and painting the woodwork in attractive colors and informs us that he intends to paint the front. Mr. H. D. Booker is doing the work.

The roadmakers are making rapid headway on the Olds-Sundre highway. The powerful dirt-moving machine is now digging into the hills at the Little Red, the object being a more even and lower road-grade at that hilly point. — OLDS GAZETTE

George Julien had the honor of being the first in this district to hunt quail. When the bob-white quail arrived last week George found that the pen he had prepared wasn't tight enough to hold them. One pair escaped, but he recaptured them — with a fish net.

At the Hunter Valley Well a full 3-shift crew is cleaning out the debris from the bottom of the hole in preparation to continue drilling from 4,814-ft. at which it has been standing shut down during the cold weather. R. J. MacLaren, vice-president and managing director of the company, stated that work was not kept up during the winter as the drilling costs were higher than during mild weather. The well, at 4,814-feet, is reported to be in the Fernie shales.

Social Credit Meeting

Social Credit Group No. 2 will hold a public meeting at the Opera House on Tuesday evening April 30 at 8 p.m. Mr. F. Anderson, of Calgary will be the speaker.

Prepare for Tennis Season

The local tennis club is making preparations for the coming season and the members are at present making improvements to the courts. Two truckloads of red shale have been obtained from Carbon and this is expected to put the courts in excellent condition.

Mr. Lorne Frey has again been elected President, with Mr. Bob Eubank as Vice-President and Mr. Doug. Robertson as Sec.-Treas.

Membership fees have been set at: Gents \$5.00; Ladies \$2.00, and students \$1.00. It is anticipated that there will be a larger membership and a successful season is looked forward to.

Knox United Church Notes.

Sunday, April 28 the choir of the United churches of Olds and Didsbury will exchange services. The Olds choir will be accompanied by Rev. F. H. James, who will preach at the evening service here. The visiting choir will render special music, and a large attendance is expected. The Didsbury choir will render the Easter Cantata, "Resurrection Light," at Olds.

Eddie Clemens visited the home of his parents, Mr. and Mrs. M. Clemens on Sunday.

Mr. and Mrs. Stocks and Miss Elsie of Olds visited the Boorman home over Easter weekend.

Misses Winnie, Kathleen and Margaret Adshead are spending the holiday week with their grandmother, Mrs. Adshead at Calgary.

Mrs. H. Halton of Pincher Creek and Mrs. James Cummings of Seattle were visitors at the home of J. W. Halton on Saturday.

The Gun Club will hold their 1st shoot of the season on Monday, May 13. For further particulars see Mr. George Julien.

Mrs. Ashe, Miss Florence Kulbeck and Havie, of Montana, are visiting relatives and friends in this district. They motored through in their new Terraplane last week.

Fifteen members of the Eastern Star paid a visit to the Carstairs chapter Wednesday evening of last week. Other visitors from Olds were also present.

Mr. and Mrs. Roger Barrett spent the weekend at Banff. We are pleased to see that Roger is able to be around again after being confined to his home for several weeks.

Fatal Accident.

Charles Mah, 28-year-old Chinaman of Carstairs, was almost instantly killed when a car in which he was a passenger crashed into the rear of a trailer loaded with telephone poles, stalled on the Edmonton trail about six miles north of Calgary shortly after 9 o'clock last Thursday night. The truck pulling the trailer loaded with telephone poles, going north, was driven by John Allen of Didsbury. The car containing Mah and another Chinaman, Wai Louis, was driven by Thomas Wah of Calgary and crashed into the ends of the telephone poles protruding from the rear of the truck, according to police reports, badly damaging the car and inflicting fatal injuries on Mah.

Constable R. C. Fenn, R.C.M.P., driving to Calgary from Irricana, arrived at the scene a few minutes after the crash occurred and telephoned to the city for an ambulance, which arrived carrying attendants and Dr. A. T. Fisher.

Mah was dead when the ambulance arrived and the two injured men were removed to city hospitals after receiving first-aid treatment.

The body of Mah was taken to the Armstrong funeral home, where an inquest opened, the jury sworn in, and adjournment ordered by Dr. G. R. Johnson, coroner, until the other victims should recover.

Golf Club Meets.

The annual meeting of the Golf Club was held Monday evening when Mr. E. G. Ranton was elected president; Mr. J. A. McGhee, vice-president and Mr. J. Wordie secretary-treasurer.

The season's fees were set at \$5.00.

It is intended to improve the greens and put the course in better playing condition.

School Fair Concert

Four schools united in giving a concert in aid of the Community Hall School fair at the Community Hall on Friday evening.

There was a very large attendance which showed the interest the community have in the children's school fair.

The schools taking part were Rosebud, Mona, Neapolis and Jutland, and several numbers were given by each school.

The very efficient manner in which the children took their various parts in the drills, dialogues, songs, etc. was a compliment to the teachers and showed their interest in the children outside the ordinary school work.

As a result of the effort over \$25 was added to the school fair funds.

A lunch was served after which a dance was given to music supplied by Halliday's Orchestra.

Is Democracy A Failure?

Articles appearing in this column from week to week have, over a considerable period of time, had two main objectives,—to convey information and to provoke constructive thought on the part of the reader. At the same time an earnest endeavor has been made to refrain from discussion of questions which are the subject of partizan political controversy or of sharp differences of opinion arising out of racial or religious views. In the present disturbed state of the world, when practically every financial, economic and social question has become part and parcel of some political creed it is no easy matter for any writer, unless he confines himself to meaningless platitudes, not to appear to take sides and express views which others may interpret as somewhat partizan in character one way or another. Notwithstanding this difficulty an honest effort has been made in this column to steer clear of partizanship while at the same time in discussing matters of public interest to give some point and value to these articles.

The writer is firmly convinced that what is needed at all times, and never more so than at present, is adherence to well grounded sound principles, the dissemination of accurate information, and clear constructive thinking on the part of each individual citizen. A demagogue may be clever and interesting and able to sway a mob, but he is not a safe and constructive leader and a mob is a dangerous thing.

This week we propose to submit a few questions, but do not intend to answer them. Rather our object is to have the reader answer them for himself or herself; in other words, do their own thinking.

General Hugh S. Johnson, until recently director of Roosevelt's NRA programme, stated the other day that "democracy is the best government in the world for peace and prosperity, but it is the worst government in the world for a great war or a great crisis." Is this true, and if it is true what does such a statement or situation imply? Does it mean that democracy as a system of government is right, but that the people who constitute the democracy, and therefore the government, are unreliable and cannot be trusted? Is it the system or the people who are weak? Does it mean that when things are proceeding smoothly and the people have a minimum of worries, they are careless, thoughtless, indifferent? Does it mean that when a crisis develops these same people become panic stricken, emotional and reckless, ready to act precipitately without taking thought of the ultimate consequences of their action?

Does General Johnson's statement, if true, imply that the nations of the world should abandon democracy as a system of government and revert to more autocratic and dictatorial forms of government, thereby relinquishing the political freedom which is now theirs, and entrusting to such more autocratic governments full control at all times, in peace and prosperity as well as in times of war, emergency and crisis?

If democracy is not to be abandoned, and we are not to accept Communism, Facism, Socialism, or other forms of government which involve abandonment of existing democratic political rights and freedom, how is democracy to be made safe for the world at all times, because it cannot be thrown into the discard in times of trouble and emergency and resurrected and made to function efficiently the moment the crisis passes?

It will be admitted that with the coming of what has been termed the Industrial Revolution of the Nineteenth Century, human society was completely reorganized. The worker has risen from his old feudal state and there has been an extraordinary rise in wage levels and living standards. With this rise of the economic status of the worker there has been an even more pronounced rise in his social and political status. Public schools, newspapers, labor unions, and the influence of wage-earners as consumers have established the political power of the workers and primary producers. The universal ballot, without property or educational qualification, have given control of government to the masses of the people.

Commenting on this development a professor of economics in one of the great American universities has written: "Here lies the danger of injury to progress. This power has been obtained, naturally enough, in advance of economic knowledge. Visionary theorists and self-seeking politicians may guide and direct it into perilous paths. Nobody wants to throw back this tide of democracy. Nobody can. But it needs to learn self-control and to gain understanding. It has neither at present."

Is this professor of economics right? Is democracy endangered by lack of self-control and understanding on the part of those very people who have the most to lose and suffer if democracy is lost to the world, and who have the most to gain and enjoy if democracy is maintained and made to function in times of emergency and crisis as well as in times of peace and prosperity? In a word, are our present political rights and power under democracy to be unthinkingly utilized in a time of stress and emergency to overthrow and destroy democracy itself? Are people going to prove the truth of General Johnson's observation that democracy is not a safe system in times of crisis?

How can people be taught self-control in times of emergency? How can the tendency to panic be overcome? How can understanding be given to the masses so that they will refrain from panic and exercise self-control and thus overcome the crisis and prevent the taking of disastrous action? How, when there are always demagogues, agitators, self-seekers whether in politics or other spheres, ever ready to inflame and mislead the masses, are these masses of voters who to-day control all governments, going to be educated to think for themselves, refrain from being influenced by mob psychology, and exercise self-control through the obtaining of sound knowledge and an understanding of basic irrefutable principles?

Doctors advise this natural corrective for Constipation! Not a drug . . . safe, effective, economical!

Stop sour stomach, bad breath, headaches and all constipation ills. You can do it easily, cheaply with Quaker Bran.

Quaker Bran, the coating of the wheat, is milled so soft it cannot irritate. Yet it is effective. It works with nature to produce normal, healthy bowel movement . . . persuading the intestinal muscles to normal activity.

Remember, Quaker Bran is different from all prepared bran cereals. It is pure bran, uncooked—untreated—unadulterated. For these reasons it is definitely richer in mineral and vitamin content.

Serve it with your regular cereal each morning or in muffins, cookies, etc. There is a recipe book in every package.

QUAKER BRAN

Pure, Natural, packaged bran.

Bells Rung Electrically

Italian Villagers Looked For Miracle Until Mystery Solved

When they heard the bells of the little church of Sante San Pietro ringing for a number of days and nights, apparently by themselves, the villagers of Lucca, Italy, thought it portended a miracle. The clappers of the bells were tied and the parish priest locked the bell tower and put the key in his pocket. But still the bells went on ringing. Finally the local electrician discovered the bells were being rung electrically as the overhead wire for the tramway line between Lucca and Maggiano had come into contact with the belfry. Now the villagers are able to sleep again.

Cheerful Factors

Moderate Improvement Shown Is Expected To Continue

"The moderate improvement reported a year ago may be expected to continue," the fourth annual "Farm Outlook for Saskatchewan" prepared by Dr. William Allen and Professor E. C. Hope of the department of farm management of the University of Saskatchewan, predicted. Wheat doubtful but more likely to rise than decline, some improvement over last year in prices for beef cattle, dairy cows and butter, rising prices for sheep and work horses, and a rise in wool towards the end of the year, are some of the cheerful factors indicated.

DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

So bad was his rheumatism that his friends declared he would never work again. Although he is 70 years old, he proved they were wrong. Read what he says:—

"I am seventy years of age. Last Christmas I was completely doubled up with rheumatism. I could not brush my hair nor wash myself. People said I should never work any more. I am working harder than a young man to-day. Thanks, many thanks, to Kruschen Salts. I take them in my tea, and I have recommended them to many. I could not get in or out of bed myself, nor sit up. But see me work now—12 hours a day sometimes. Kruschen Salts have done it." G. J.

Rheumatic conditions are the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients assist Nature to expel these dissolved crystals through the natural channel. In addition, there are still other salts in Kruschen which prevent food fermentation in the intestines, and thereby check the further accumulation, not only of uric acid, but of other body poisons which undermine the health.

Watch Is Recovered

Lost In A Bag Of Relief Foodstuffs, Watch Will Go Back To Ontario

Lost in a bag of relief foodstuffs forwarded in a carload to Saskatchewan last fall, a wrist watch belonging to Mrs. Oscar Coleman, Delta, will be returned to her.

The watch was found by a relief recipient at Luseland, Sask. Mrs. Coleman missed the watch after the bag was forwarded and word was sent to Saskatchewan where a newspaper advertisement led to recovery of the timepiece.

To Suppress Crime

United States Enforcement Agencies Make Widespread Drive On Law Violators

A total of 1,219 arrests was reported by United States treasury law enforcement agencies as a result of a coast-to-coast drive against law violators.

Narcotic peddlers and addicts, smugglers, counterfeiters, liquor tax evaders, violators of every law for which the treasury holds enforcement responsibility, were rounded up the country over.

Approximately 50,000 Canadian farmers and other land owners are in the maple sugar business.

Left Estate To Servants

Chauffeur, Cook, And Maid Inherit Mansion Of Mistress

A chauffeur and his wife, a cook and an "upstairs girl" are masters and mistresses of an estate at Newton, Mass., in which a few days ago they were servants.

The will of their late employer, Mrs. Jessie A. Goddard, 80, left them the stately mansion to do with as they saw fit.

Heirs to the estate were William Wilson, for 25 years Mrs. Goddard's chauffeur; his wife, Annie; Miss Margaret Macauley, cook; and Miss Jane Douglass, maid.

Other bequests, totalling \$200,000, were distributed to friends, former servants, charities, churches and distant relatives.

PILE TORTURE NOW UNNECESSARY

Writer Offers To Prove Swift Value Of Home Method

The torture and suffering from Piles is well nigh inexpressible, and on account of the delicacy of the subject, many hesitate to seek relief.

Why continue the miserable torture of Piles, or neglect your condition until a painful and expensive surgical operation is necessary, when a safe, pleasant Home Treatment may bring you such freedom from soreness and pain?

VANDERHOOF'S PILE REMEDY is a special "Time-Tested" private method that brings almost instant relief. It is soothing, healing and absorbing, without the use of appliances, messy salves and lotions to stain and embarrass.

Simply send your name and address and enclose 5 cents and a generous trial treatment will be sent to you.

VANDERHOOF & CO. LIMITED
Box 247 Dept. 55C.6. WINDSOR, Ont.

Cattle exported from Canada to Great Britain in 1935, from January 1 to February 21, numbered 4,781.

Must License Variety

According to the Canada Seeds Act, no new variety of cereal grain can be offered for sale in Canada under its variety name unless that variety has been licensed by the Dominion Minister of Agriculture after tests conducted by the cereal division of the Dominion experimental farms.

Kidney Troubles

Some poisons to accumulate in the system and bring on persistent Backache, Lumbago, Rheumatism, or Sciatica. Take Gin Pills to restore the kidneys to a healthy condition and eliminate the poison from your system.

Thanks Anyway

Uncle John came to stay, and before he left he gave his nephew a pound note. "Now, be careful with that money, Tommy," he said. "Remember the saying, 'A fool and his money are soon parted'." "Yes, uncle," replied Tommy, "but I want to thank you for parting with it, just the same."

Bunches of small carrots were worn as corsages by the ladies of the court of Queen Elizabeth.

President Of Canadian Legion Makes Plea For Scientific Study Of Conditions of War Veterans

The present inquiry into the unemployment situation among ex-service men was not "another veterans' ramp on racket," Brigadier-General Alex. Ross, Dominion president of the Canadian Legion, told the Hyndman commission at Ottawa. It was an effort on the part of the organized veterans to secure a scientific study of conditions as they exist and to contribute to that study the experience and wisdom of the veteran body of Canada.

The commission is under the chairmanship of Mr. Justice Hundman, president of the pension appeal court, and includes Col. C. B. Price of Montreal and W. B. Woods of Toronto. General Ross emphasized that the ex-service men were "not after money". He did not want the government to make any expenditures on them; but they did want to assist the government to ensure that what expenditures were made, were made scientifically and with proper regard to economy and usefulness.

Unemployment bore more heavily on ex-service men than on the rest of the community and even with the return of normal conditions, said General Ross, it would be difficult for the workless veteran to be speedily, or profitably, absorbed in industry.

The Legion president summarized his conclusions as follows:

"During these years of depression there has grown up a great army of youth, clamoring, and rightfully clamoring, for admission to trade and industry wherein they can work out their destinies, as they are entitled to do. They are young, generally well educated and capable of rendering efficient service.

"The unemployed ex-service man has to meet this competition, subject to the following handicaps:

"The average age of the group is believed to be approximately 47 years.

"By enlisting for service of his country, and while he may have returned physically unimpaired, yet he sacrificed opportunity.

"There is a large proportion of unskilled labor. Thousands of boys between the years of 16, 17 and 18, or thereabouts, rushed from school to the forces. For years their every move was ordered and they returned grown men, totally unacquainted with the struggle for economic existence.

"So many suffer from war disability. According to the figures for 1934 there were then in Canada 77,855 disability pensioners, of whom 50,677 were in receipt of pensions assessed at less than 40 per cent, and with average pension, exclusive of dependents, of \$210 per annum.

"The parliament of Canada, in accepting the War Veterans' Allowances Act, accepted the principle that in modern warfare there were intangible disabilities resulting from nervous or other form of strain, and, as a result, during the fiscal year ending March 31, 1934, 3,069 ex-service men under the age of 60 years, were classified as permanently unemployable. It is reasonable to suppose that a very much larger number are practically unemployable.

"Continuous unemployment has affected these men more seriously than in the case of other unemployed. They are conscious of having served their country well, they feel that they have been forgotten, and it rankles, and they worry over their children. They feel that an ex-service man's children should be brought up to be self-respecting citizens, not objects of relief."

The ex-service group, said General Ross, was a federal responsibility for the following reasons:

First, because to a very large degree their physical and industrial condition cannot be dissociated from war service; second, because they are handicapped by lack of training and opportunity as a result of service and third, because it is well known that recruiting was not uniform throughout Canada and it is unsafe that communities from which there was practically a 100 per cent, enlistment should now have to bear

the burden of these aging men, while others, from which the response was not so great, should escape such a burden.

It is only through federal intervention that this burden can be uniformly distributed and the relief afforded uniformly effective. There is abundant evidence that many municipalities in Canada regard their responsibility towards unemployed ex-service men in this light, with the result that ex-service men and their families often suffer accordingly.

In conclusion General Ross urged that special machinery be devised to deal with every case receiving aid. Government aid and voluntary effort were an ideal combination in that they would free the situation from the influence of politics and departmentalism.

GARDENING

Gordon L. Smith

Starting Seed Indoors

If the seed is started indoors, from two to three weeks can be saved with many flowers and vegetables. In districts where the growing season is rather short, certain things must be grown in this way if bloom or maturity is to be guaranteed. Among the flowers are pansies, asters, marigolds, zinnias, petunias, cosmos, larkspur, stocks, and snapdragon, though with the possible exception of the petunia and aster, good results can also be secured in the warmer sections of the Dominion from seed sown in the open ground. With vegetables there are peppers, tomatoes, cabbage, cauliflower, egg plants, brussels sprouts, broccoli, celery and head lettuce. Naturally, when sown under glass in March, and set out as well started plants in May, such things are away ahead of seed sown in the open ground after the spring frosts are over.

Add New Things

Much of the interest in flower gardening lies in trying something new. Of course it is not advisable to make over the whole garden each spring, nor should one abandon completely all those old favorites which have done well in the past, but without something entirely new each season, some interest will be lost. In a special part of every seed catalogue will be listed the very latest creations in both the flower and the vegetable kingdoms. Certain flowers which were always double before now appear in a single type, or perhaps a new distinct color has been added. Giants have been dwarfed, like the new tiny zinnias, or very much increased height, added to something which a few years ago could only be secured in midsize. Practically all the leading flowers may now be secured in both doubles and singles.

When To Plant

The first vegetables to be planted are those things that are very hardy and will stand a fair amount of frost. These should be sown just as soon as the soil can be worked. They largely consist of the type of which the leafy part is eaten like lettuce and spinach, though also included will be the radish, garden pea, onions, beets and carrots. Later when the weather has turned definitely warmer, and there is little danger of frost, in go the second group, such as beans, cabbage plants, potatoes and corn. These are followed by melons, squash, cucumbers and pumpkins, vegetables that cannot stand any frost whatever and will not make growth until both the air and soil are warm. The above are general first planting rules only. With most vegetables successful planting is desirable, a little of the seed sown each week or ten days from first planting date on, so that the harvest will be spread over weeks instead of days.

Visit From German Warship

A sleek, grey vessel glided to an anchorage in Vancouver harbor in a recent week and the event re-opened a chapter in German-Canadian relations that has been closed for more than twenty years. When the liberty boats of the German cruiser Karlsruhe discharged their cargoes of trim uniformed cadets and nattily dressed officers, it was the first time since before the World War that a German uniform has been worn on Canadian soil.

Northern Ireland has a campaign against motorists who "cut in" on carts.

Wealth In Muskrat Industry

Ranching Area Now Being Surveyed In Northern Manitoba

Furnished with startling proof of wealth producing possibilities in the muskrat industry, the provincial government has placed a survey party of 40 men in northern Manitoba to map out a muskrat ranching area of 700,000 acres between The Pas and Cedar Lake.

Trapped almost bare of muskrat life in past years, this area is staging a great comeback as evidenced in the success of Thomas Lamb, fur rancher, who leased 54,000 acres from the province three years ago and last season trapped 12,000 muskrat. Three years ago only 40 muskrat houses were found on the Lamb ranch. To-day as the result of careful protection there are 9,000 "rat huts".

It is estimated by authorities that the area, under proper protection and with scientific conservation, is capable of producing at least \$155,000 muskrat pelts a year, and this is held to be a conservative estimate.

New Mountain Range

Discovered By Young U.S. Explorer In Yukon Territory

Discovery of a hitherto unrecorded mountain range and a large glacier in the southwestern corner of Yukon Territory has been reported to the National Geographic Society by Bradford Washburn, young explorer of Cambridge, Mass. Washburn telegraphed from Carcross, the expedition's base camp had been established near the tongue of the unknown glacier which descended eastward for nearly 50 miles into the Alsek valley from the peak of Mount Hubbard, one of the highest of the St. Elias range.

Story Of Fish Food Tells Of Utilization Of The Energy From Sun's Rays Falling On Ocean

Pre-Cooling Dressed Poultry

Very Necessary To Avoid Any Freezing During Process

The object of pre-cooling dressed poultry before packing is to remove the animal heat from the fowl as quickly as possible. The loss in weight during pre-cooling is usually about one-quarter per cent. of the original weight of the birds. Thus, as Dr. W. H. Cook, of the National Research Council of Canada points out, one ton of poultry will give off about five pounds of moisture, or enough to saturate 17,000 cubic feet of air at 32 degrees Fahrenheit. Poultry should be pre-cooled at from 30 to 32 degrees Fahrenheit, this being the lowest temperature that can be employed without freezing. It is particularly important to avoid freezing, even at the surface, if the product is to be held in the chilled condition. In a room 30 degrees Fahrenheit poultry can be cooled from a temperature between 80 to 100 degrees Fahrenheit to within 2 degrees of the room temperature (30 degrees) in 10 or 11 hours, and to the room temperature in from 20 to 24 hours. Ideally, poultry should be packed at the temperature at which it was pre-cooled, but for the comfort of the graders and packers it is customary to work at a somewhat higher temperature.

The skin of white whales from Hudson Bay region is exported and used in fine leather goods.

Because the sea is full of diatoms and copepods the energy from the sun's rays falling on the water is made available to man.

Perhaps for most people, however, that statement needs amplification or explanation before it will be fully understood. The average man probably doesn't know a great deal about diatoms and copepods, though the words may be commonplace terms to the scientist. An extract from a recent paper by Dr. J. L. Hart, a member of the staff of the Pacific Fisheries Biological Station conducted at Nanaimo, B.C., by the federal authorities, explains the matter concisely and clearly, and is likely to be of interest. Dr. Hart was writing of the British Columbia pilchards, which are a part of the raw material of Canada's fish canning industry and are used also in producing large quantities of fish meal and oil. Where, he said, do the pilchards find food which can enable them to provide two or three million gallons of oil annually, and he went on to answer the question in these words:

"The pilchard has two main items of diet—minute, free-floating plants, called diatoms, and small relatives of the shrimp, called copepods. The copepods in turn feed on diatoms and other very small plants. By means of their green pigment these microscopic plants make use of the radiant energy of the sun's light to transform the small amounts of carbon dioxide dissolved in the sea water and some of the water itself into stores of goods, and thus they retain the energy for future use. However, the pilchard comes along, eats diatoms and copepods, digests them, and rebuilds them into its own kind of oil and flesh. In this way the energy of the sunlight falling on the ocean is made available to man."

Of course, this doesn't happen only in the case of pilchards alone. Other fish get their food in the same way, eating diatoms and copepods and, in some cases, smaller fish which have eaten these tiny plants and creatures. The situation, as Dr. Hart points out, is entirely analogous to the case of sheep or other land animals which by grazing in the field accumulate the energy which has been fixed, chiefly as carbohydrates, by the green pigments of the grass.

Paving Slabs From Refuse

British Towns Using Idea To Keep Taxes Down

Household refuse is helping to keep the taxes down in some British towns. After passing through the furnace at the local dust destructor the rubbish, in the form of clinker, is taken out and cooled. Then it is crushed, mixed with cement and water and subjected to very high pressure in a giant press. Moulded slabs are thus formed. After being stacked in the open, a kind of "curing" process, they are used to make pavements throughout the town. In one South Coast town 600 paving slabs are made per week. The broken slabs are sold to the residents, who use them for making crazy pavements in their gardens. It is estimated that this method of using up household rubbish saves the town hundreds of pounds in the course of a year.

The Best Citizen

One Who Has Welfare Of Community At Heart

Of all the lost talents, that of being long, of being a true member of the community, is the greatest, and for many in our large cities, the least expressed. To be a true neighbor, citizen, patriot—to take on the State, so that what it does, you do to have the State within you, so that all that wounds public life hurts you—is to recover the top root of existence, to lay hold of the most vital of all the strands of life.—Joseph Loh

A wheel equipped with a number of shovels is a German device for speedy excavating.

The SNAPSHOT GUILD

FLOWER PICTURES

Your flowers may wither and die but a picture of them will live forever.

It would be quite unusual to find a mother, wife or home-maker who hasn't a potted plant, vase of artificial flowers or an object of art in the house that for one reason or another has become the "favorite."

Flowers are much like friends. You no doubt like and respect all of the friends you associate with socially or you wouldn't seek their companionship nor accept their hospitality. There is invariably, however, one or two you like particularly well. There is something about them that appeals to you. Their very presence cheers you. It may be their personality, their manner of speech, their consideration of others, even their idiosyncrasies or many other things referred to and classified under the small but greatly publicized word "It."

We can't say that flowers have "It". That's stretching things a little too far; but they do have a way of becoming a bright spot in our lives.

Why not keep a record of their growth and beauty with snapshots? You can take good pictures of flowers with any camera in the house or outdoors but to-day let's discuss pictures of flowers in the house.

Proper lighting is the foundation for good flower photography. It should be remembered that shadows are necessary to properly reproduce form in any graphic illustration. In outdoor photography natural lighting is depended upon so it is necessary to wait until the sunlight comes from the right direction to get the proper lighting for your subject. In this respect indoor picture taking has its advantages. You make and place your own lighting.

As a general rule, bright direct overhead light is not desirable so

the best results are obtained when lighting comes more from the sides so as to cast interesting, artistic shadows.

Successful flower photography has been made quite easy with the introduction of super sensitive panchromatic film. This film provides users of roll-film cameras with the advantages of extreme speed under artificial light and complete color sensitivity heretofore available only in cut film and plates. This film, sensitive to all colors, records the various color tones more in the variation of brightness as seen by the eye.

The diagram above shows how the picture to the right was taken. It is best not to place lights directly in front of the subject for in doing so you will generally fail to get depth in the picture. You will notice that the tray, used effectively as a background, is tilted against the wall and not flat against it. By tilting the tray the shadow to the right is made possible and adds greatly to the depth and attractiveness of the picture.

As shown in the diagram, you will need two photo-flood lamps placed in an ordinary floor lamp with the shade tilted slightly upward. If you cannot tilt the shade remove it entirely and hold a white cardboard, sheet or even a bright dishpan behind the lamps to serve as a reflector. You may want to do your own experimenting in the placing of the photo-flood lamps to get shadows that please you most.

After locating the subject in the under set the diaphragm at f.6.3 and the shutter speed at 1/25 of a second and take your picture.

Your flowers may wither and die but the picture will live forever.

J. E. Gooder - Editor & Manager

Letter of Thanks.

To the Editor,
Didsbury Pioneer.

Dear Sir,

Your Annual Drive on behalf of
the Wood's Christian Home has
been completed, and with heartfelt
thanks Mrs. Wood, the Board of
Trustees and the Children at the
Home, send this letter to all the
good folks of the Didsbury district
for the splendid results and the
great interest taken in our Institution.

More particularly do we wish to
express our sincere appreciation to
the people who donated so liberally
from the scanty returns in your dis-
trict last year: cash, meat, fowl,
eggs, vegetables and preserves, in
large quantities—tangible evidence
of the personal concern you have in
our little folk.

To the gentlemen who gave so
freely of their time to collect the
donations we feel that we owe a
debt of gratitude, and we all join
in expressing our appreciation of
the great service they rendered.

To the Faithless Cartage for
delivering the goods. Owing to us
being about 60 miles from the source
of supply, heavy expenses would
have accrued if it had not been for
free delivery. Therefore we are
grateful for this donation.

To the Didsbury Milling Co. for
milling the wheat into breakfast
foods and pancake flour, our thanks
are due. Such wholesome food is
most acceptable and greatly enjoyed
by our "BIG FAMILY."

To everyone who by their efforts
contributed to this humanitarian
enterprise we send our blessing, and
may the Great Master of us all
reward you abundantly.

We extend an invitation to visit
our Home any time you are in Cal-
gary. We have not any special
visiting days.—The latch is on the
outside of the door, turn it and
walk in.

Mrs. Wood will greet you and
show you her Happy Family at their
work and play; give you an insight
on how she mothers Alberta's "BIG
FAMILY OF LITTLE FOLK"—
and let you see for yourself what we
do with all the good food you send
us.

Our "Home" is full to overflow-
ing. Over one-hundred kiddies fill
our dormitories at the present time;
so the work goes on and, we trust,
with great benefit to the dear little
folk who will be Canada's men and
women in the near future.

Again expressing our grateful
thanks to all.

Yours very sincerely,
D. B. ROBERTSON, MANAGER
Wood's Christian Home.

YOU will be MORE THAN
SATISFIED by having your
Watch, Clock, Phonograph, or
Sewing Machine fixed right in
Didsbury. All my work is
guaranteed. Reasonable prices.
See Me at the Club Lunch:

Watchmaker & Jeweller

Have YOU Subscribed?

MAY 6th will be here
before we know it. On that day
His Majesty King George V will
celebrate the 25th year of his
reign. Greetings and mementos
will be showered upon this popu-
lar sovereign in his London home.
And not the least welcome will
be the report of the Silver Jubilee
Cancer Fund, bearing the names
of those who contributed to this
splendid gift, as Canada's Na-
tional recognition of the day.

His Majesty will be acquainted
with the amount raised and the
details of the campaign, but
every cent donated will be used
to combat cancer in Canada.

Never has an appeal met with
such a sympathetic response,
thousands have promised to give
their support by sending a dona-
tion. But it is so easy to leave
until tomorrow. The Cancer
committee for Alberta, appeals
to you to send your donation to-
day, no matter how small. Place
it in an envelope, enclose your
name and address, written plain-
ly, and address to Lady Bessbor-
ough, Ottawa. You will receive
a personal acknowledgement
from her Excellency. In order
that the lists may be completed
before May 6th, the committee
asks that everyone planning to
help this worthy cause do so in
the coming week.

Beauties With Their Beasts

Just another beauty and the
beast picture, but the beauties
are overshadowed by the beauties
in this display of feminine and
pachydermic pulchritude.
The girls hail from three na-
tions, Canada, the United States
and Great Britain, and the hand-
some elephants were acquired by
them during a visit to Ceylon.
They are bringing them home in
their baggage—pardon us, trunks,
but that won't be until their
world-cruise in the Canadian Pa-
cific liner Empress of Britain is
over in May. The picture was
made on the boat-deck of the Em-
press of Britain at Colombo.

CHILDREN'S COLDS

WORLD HAPPENINGS BRIEFLY TOLD

Reunion of Toronto survivors of the Northwest rebellion in 1885 has been planned for July 26.

Lord Edward Montagu, young British nobleman who is determined to lead "a life of adventure," was said by friends to be planning to join the Spanish foreign legion.

The Quebec government's \$10,000,000 plan, "to promote colonization and return to the land," received third reading by a 41-8 vote, in the Quebec legislative assembly.

Amendments to the British Columbia Hours of Work Act to provide a six-hour day and 36-hour working week were defeated in the legislature.

Former Premier Eleutherios Venizelos, leader of the unsuccessful Greek revolt, forecasts policies of the present Greek government would lead to restoration of the monarchy.

When it comes to fighting a duel, J. E. Pageot, Montreal restaurant owner, prefers soda bottles to revolvers any time. Pageot routed a bandit by laying down a barrage of soda bottles.

A thoroughbred Great Dane, Sax of Cairndania, will leave York Mills within the next two weeks to become guard for the Dionne quintuplets' hospital at Callander, Ont. Mrs. George Hyslop is making the presentation.

Possibility of distillation of fuel alcohol from surplus low-grade potatoes will be studied and representations made to the provincial government by Edmonton District Market Gardeners' Association, that body has decided.

Soviet authorities announced the arrest of 1,074 members of the old aristocracy and old moneyed class. Some of them, it was said, will be tried for "activities against the state in behalf of foreign countries," while the rest will be exiled to the eastern reaches of the Soviet Union.

The number of hogs graded in Canada for the first eight weeks of 1935 was 173,011. During the corresponding eight weeks of 1934 the number was 517,324.

New Zealand was the principal source of butter imported into the United Kingdom during 1934, supplanting Denmark as the premier exporter.

Little Journeys In Science

PETROLEUM

(By Gordon H. Guest, M.A.)

Petroleum consists chiefly of a mixture of compounds known as hydrocarbons. It is found in large quantities in California, in Oklahoma, in Russia, Mexico, the Dutch East Indies, Galicia, Persia, and Rumania. In 1925 the world's production of crude petroleum was about 1,000,000,000 barrels.

Crude oil is trapped in what the geologist calls an anticline, which is a sort of inverted bowl of clay or shale, and is reached by drilling wells. The first oil well in America was dug by Colonel Drake at Titusville, Pennsylvania, in 1859.

Russian petroleum is found in and around Baku, near the Caspian Sea. History tells us that as far back as 600 B.C. "the eternal fires of Baku" attracted the fire-worshippers.

Petroleum is separated into various products by a process known as fractional distillation. The compounds which make up petroleum boil at different temperatures, and hence they can be separated by distillation. One fraction comes off as a vapour at a certain temperature, and is collected in the receiver of the still. When most of this fraction has been boiled off the temperature is increased, and another receiver placed in the still to collect this fraction of the petroleum.

Petroleum contains gases in solution, such as methane (marsh gas) and ethane. When the crude oil is heated gently these gases are driven off and used as fuel and for the manufacture of carbon-black, which is of value in the paint industry. As the temperature is slowly increased liquids which are known as naphthas come off as vapours, and are condensed by cooling to liquids again. The scientist finds that these liquids consist chiefly of pentane and hexane.

This fraction of the petroleum is used as a solvent in the rubber and varnish industries. The next fraction is gasoline, which is used extensively as motor fuel and as a solvent. Kerosene (coal-oil) comes off next and is used as an illuminant and a fuel. After the kerosene is distilled off, lubricating oils and paraffin are obtained. The tar-like material which is left in the still is used as artificial asphalt and as a source of a light, porous coke.

FOR DISTINGUISHED SERVICE

As the annual award for distinguished service to the Canadian mineral industries, the medal of pure Canadian platinum shown above, was made to S. J. Blaylock, noted Canadian mining executive of Trail, B.C. The first of the platinum medals, designed by the famous sculptor, Tait McKenzie, was struck at the Royal Mint in Ottawa.

New Style Torpedo

Invention Of Italian Scientists Does Not Warn Of Approach

A torpedo which gives its victims not even the present momentary warning of its approach is to be added to the submarine terrors of the next war. Two Italian scientists have produced a torpedo which leaves no track. The motive power is ammonia gas, which dissolves instantly in water. Present day torpedoes, driven by compressed air, leave a tell-tale track of air bubbles. These can be sighted at a distance and the victim is thus given a slight chance of manoeuvring out of danger.

Sees Large Tourist Business

Banner Year Predicted By Official Of Travel Bureau

Prediction 1935 would be a banner tourist year with business approximating the \$309,000,000 peak year of 1929 was made by D. Leo Dolan, director of the Canadian Travel Bureau, Ottawa, in addressing the Advertising Club of Montreal.

The tourist dollar was the "healthiest money" the Dominion could hope to receive this year and in the years to come, he said, as it increased general employment and made possible greater distribution of the products of the farm and stream.

The blind of York, England, are to be given free rides on trolleys and busses.

Workers' Rights

Need Of Amicable Arrangements Between Masters And Men

Acceptance of the workers' right to live comfortably and participate in their part of the direction of industry was set forth by one of the foremost figures in Canada's mineral industry as tantamount to preservation of existing social and industrial fabrics.

Selwyn Gwilym Blaylock, vice-president and general manager of the Consolidated Mining and Smelting Co., Trail, B.C., invited 300 members of the Canadian Institute of Mining and Metallurgy to study the "co-operative committee" system his company has substituted for trade unionism.

Declaring government labor legislation or state-controlled industry quite inadequate, the president of the institute stressed the need of amicable arrangements between employers and employees to put industry and commerce on a sound basis.

Mr. Blaylock's address featured the closing day of the institute's three-day meeting in Winnipeg. Mr. Blaylock was presented a platinum medal for his "outstanding contribution" to the mineral industry.

Employers did not monopolize the

Tally Kept On Paper

Reason Tally Sticks Were Discarded At London Docks

Any day in the London Docks you may see the skipper or mate of a cargo ship, or the Customs House man, checking cases that are being loaded or unloaded by making strokes on a piece of paper. When the fourth stroke has been made all are crossed through, constituting a "gate," and a "gate" means five packages. And if this system of using strokes instead of figures had never prevailed, London's most sensational fire since the Great Fire of 1666 would never have occurred. A hundred years ago this year the Clerk of Works at the House of Parliament told a workman to burn a couple of carloads of wooden tallies—which were notched sticks divided into two parts and used as receipts for goods delivered. The workman did his job so thoroughly that the stoves became overheated, and set fire to the House of Lords, an ancient wooden structure. When the fire subsided only the crypt and cloisters were left. The custom at the London Docks to-day of making strokes instead of figures means that the tally is made on paper instead of on a stick.

Caribou Herds Are Large

Provide Plenty Of Meat For Northern Mining Camps

The largest herds of caribou he has ever seen in the Great Bear lake district are located midway between Fort Rae and Cameron Bay thereby providing a good supply of fresh meat for the men in the mining camps. C. H. "Punch" Dickens, superintendent of Canadian Airways, Limited, at Edmonton, stated on his return from a flight to Great Bear Lake.

Mining camps continue to be active and there is little evidence of unemployment in Cameron Bay, he said.

Last fall considerable apprehension was felt for a band of nearly 40 young men who went into the mining field seeking work last summer but the majority of them were apparently able to find work of some description.

Activity in the Athabaska lake gold area is increasing steadily, Mr. Dickens said.

New Plane Tested

A swift new government monoplane, equipped with an improved radio compass, soared out twice over the Pacific ocean at Oakland, Cal., testing the equipment which the U.S. department of commerce officials said may be used as the "keystone" of a system of air navigation over water.

One-thirtieth of an individual's body weight consists of blood.

A Law Every Mother Should Know and Observe

Never Give Your Child An Unknown Remedy without Asking Your Doctor First

According to any doctor you ask, the only safe way is never to give your child a remedy you don't know all about, without asking him first.

When it comes to "milk of magnesia," that you know everywhere, for over 60 years, doctors have said "PHILLIPS' Milk of Magnesia for your child."

So—always say Phillips' when you buy. And, for your own peace of mind, see that your child gets this; the finest men know. Made in Canada.

PHILLIPS' Milk of Magnesia

Free Entry Until November

Poultry and dairy products from Canada, under the terms of the Ottawa agreements, are given unrestricted free entry into the United Kingdom until November 1935, after which the British government in consultation with the Dominion governments concerned has the right to bring these products within a system for regulating supplies from all sources.

WHEN YOUR DAUGHTER COMES TO WOMANHOOD

"The Canyon Trail", Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now returns to tell Dustin and Spike Goddard, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore.

Dustin unexpectedly comes along while Stone and Edith are riding fence, and seeing them, stops and talks to Edith. He mentions their dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water.

Dustin learns that Gerald Keene has been sent for, and also that Duro Stone has seen the Broken Spur men rustling Carr's cattle. He sets out with Dad Kane to learn the location of his gold discovery. Dad Kane shows Dustin the mine.

They go back to camp, and Dustin shoots Kane. He fixes the shooting on Peyotl Gregg, a drug addict, who, stupefied by the narcotic he had taken, did not know whether he was guilty or not. They bury Kane and then return to the Broken Spur ranch.

Meanwhile at the Hour Glass, Carr, Crewe and Stone speculate as to the meaning of entries in the notebook belonging to Dad Kane that Stone had found. Stone thinks of a possible solution, and, accompanied by Edith Carr, rides out to Red Water to test out his theory, which proves correct, and they find the rich gold deposit mentioned in the prospector's notebook. As they return to the ranch,

CHILDREN'S CONSTIPATION Ended!

Mrs. H. T. Rowsome, Athens, Ont., writes: "My baby boy was troubled with constipation. I gave him Baby's Own Tablets as directed. . . . Before I had given half the box the constipation was righted." By relieving constipation, Baby's Own Tablets prevent more serious ailments developing. Much easier to take than nauseating laxatives and perfectly safe for all little folk from the wee babe to children of school age. 25c package.

TEETH

they meet Dustin leaving the house, who purposely, but unsuccessfully tries to ride down Stone.

(Now Go On With The Story)

CHAPTER XIV.—Continued

He walked on up the street and never saw the tall figure of Sam Dustin standing in the shadows by the court-house door. Dustin's finger crooked in the shadows and another figure joined him; the loose, shambling shape of Peyotl Gregg.

"See that man, Peyotl?" Dustin pointed to Stone. "That man has come in to meet the man Gerald Keene, who comes on the night train. The man will call himself Keene, but his right name's Kane. You see, the old man found a gold mine and it was on the Hour-glass land. This nephew wants to find him. If he finds him . . . you'll hang. Don't forget that. I'll be at the hotel when you're ready to go back to the Broken Spur."

Peyotl gave him one frenzied glance and his right hand sought his coat pocket. Dustin gave a little gasp. The man was half-crazed with fright and murderous intent. Dustin grabbed him by the arm. A little white foam lay in the corners of Peyotl's mouth and his eyes glared with a light there was no mistaking. After a dozen of those infernal cigarettes Peyotl was ready to kill and Dustin knew it.

"Don't you take a chance," he muttered. "Don't pull anything at the station or in public where people can see you. Wait! You'll be sure to get a chance in the dark if you wait. I'd trail 'em if I were you and choose some dark place. Of course I don't know what you're plannin'. . . . You're a damned fool, Peyotl. . . ."

He sauntered off in the dusk and Peyotl, half walking, half reeling, headed for the little station.

Stone had already picked up Carr and Crewe and was waiting at the car when the train came in with a sheet of flying sparks from the hard-set brakes. Stone himself was the first to leap to the steps of the Pullman and was almost knocked off his feet by the rush of a man who did not wait for the train to stop.

"Duro . . . Duro Stone, by all the gods! . . ." A great hand smote Stone on the shoulder, almost knocking him over. "Who's with you? We must get together. . . ."

"Wait a bit . . ." Stone muttered between his teeth. "Here's your present partner. . . . We'll have to get together as soon as we can. I've got a lot to tell you. We need two heads here. . . ."

The crowd prevented any exchange of confidences and then Crewe came up with old Joe Carr.

"Mr. Carr"—Stone grabbed Joe by the arm "you wanted to meet Mr. Keene. . . ."

A hand thrust forward and old Carr seized it. This was Gerald Keene, the nephew of his old-time partner. Gerald Keene, the only man who could help him in his hour of trouble. He shook that hand as one might snatch at a life-preserver flung in roaring seas.

"If you're Gerald Keene," he said, "you don't know how darned glad I am to see you. We've got a lot to talk over this very night."

"How about some grub, sir, first of all?"

"Fine. And after that we'll have a few drinks at the Silver Dollar and then home to the Hour-glass."

Those last words reached Peyotl, standing among the freight. He was satisfied now. The party would go to the Silver Dollar and that would give him his chance. He slunk off up the street and busied himself in the Mexican quarter of the town while Stone headed with his party for the hotel.

That dinner with its long delays and frequent drinks that came slowly from the bar, kept them till nearly ten o'clock and old Joe Carr fought his way from the table in spite of Crewe. His manager saw signs of what was coming and wanted to avoid it. Carr insisted.

"Of course Keene wants to see the sights," he clamored. "I haven't been in town for a year. I'm a wolf and this is my night to howl. Hell, man! Come on. No one's goin' to get drunk. I just want to play my old favorite 'Cripple creek' once more. Let's get down to the Silver

Dollar. They have a big lottery there at eleven."

They headed for the Silver Dollar.

CHAPTER XV.

Peyotl Gregg had friends in Seco of whom Sam Dustin knew nothing. For five years he had supposed that he was the sole source of Peyotl's dope supply but that was because Peyotl had successfully smuggled his store into the Broken Spur unknown. If Dustin had known, it would have gone hard with Peyotl. The moment he left Dustin, Peyotl sought out one of those friends.

Pascual Mendez herded sheep (and that shows how far Peyotl had fallen. Not for nothing does the proverb run "If a man will do that, he'll steal sheep"). Many of Pascual's sheep were black and Peyotl was not one of the whitest. . . . In Mendez's jacale, Peyotl took account of stock. Mendez was absent but Peyotl knew where to find what he wanted. From a hole in the trodden clay-floor he extracted an old cigar-box from which he took a red-and-green package of those ill-favored cigarettes, lit one and sat down to think. The very first puff stimulated him; the next gave exhilaration. Dustin was a good friend who had given him excellent advice and the future seemed rosy and happy. He passed rapidly from the first stage of half-lifted despair to the next, in which he saw complete fulfillment of his own desires. When he had smoked three cigarettes on an empty stomach he knew suddenly that he faced a golden future. . . . if only this man Gerald Kane . . . or Keene . . . could be removed. Who was this stranger that he should hound a man to the gallows?

"By Gar . . ." The home-made oath satisfied him. . . . He flung the cigarette to the floor, stamped out the spark, felt in his pockets and laid their contents before him. . . . the stubby little Derringer pistol and three cartridges filched, he thought unseen, from Dustin's desk; a knife, a box of matches and a huge yellow-and-green bandana neckerchief that stunk and reeked of the peyotl that he had been smoking. He very carefully loaded both barrels of the pistol, snapped it shut, wrapped it in the bandana neckerchief and thrust it into his coat-pocket on the right side.

This stranger must be removed! If he remained in Seco, his search for old man Kane, his uncle, would disclose the fact that he, Peyotl, had killed him. The result was plain.

He had heard those men say that they were going to the Silver Dollar and, of all places, the Silver Dollar was the most satisfactory for the carrying out of his plans. Of course he could not go brazenly into the bar and shoot down this man Gerald Kane. That was not necessary. Some subterfuge must be devised. He felt in his pocket to assure himself that the bandana lay ready-to-hand and moved down Seco's main street toward the lights of the Silver Dollar.

He was too wise to enter that brightly lighted room where a dozen men knew him. From the back door that gave on the littered yard he studied the place.

The bar was crowded with men from the Broken Spur, the Cross Keys and with a dozen "dry-farmers" in town for a night off. The roulette table and the chuck-a-luck stand were doing a healthy business and May Wilson keeping cases at the

BLUE RIBBON TEA 50¢

Valuable Premium Coupons Enclosed With
BLUE RIBBON TEA, COFFEE, BAKING POWDER AND COCOA

faro table had her hands full. As Peyotl stared in through the partly open back door, he realized that the setting was perfect. All he needed was the opportunity.

The slatted front door slammed suddenly open and Peyotl shrank back into the dark as Carr and his party flung into the room.

(To Be Continued)

Another Tradition Upset

Earth Ebbs and Flows Like Tides Of The Sea

A favorite occupation of physical scientists is the carefree upsetting of history, fables, or common belief by the insertion of facts which prove or explain how things really happened.

From time immemorial the good dirt regions of earth have been considered stable. Even the Romans famed instigators of tall stories, never thought of calling the ground anything but terra firma. Now, Dr. Harlan Stetson, Harvard astrophysicist, tells us that not only are we walking on a thin upper "crust" of a wrinkled old apple called Earth, but even this crust heaves to and fro like the tides of the sea.

Everyone knows the sea has its ebbs and flows, but no one guessed that land areas could be affected likewise until Dr. Stetson said so. With superaccurate clocks or chronometers, and more careful squinting at the stars, he corrected those "clocks" to the split second and found that Europe and America drift apart as much as sixty-three feet twice daily and come together again by a similar amount. All of which means another time worn tradition is ready for the discard.

But for all the researchers, when Popeye and Barnacle Bill step ashore with their curious "sealers" they can't get away with any tales about how difficult it is to get used to the billowing waves of land tides after a peaceful jaunt at sea. Nor is sixty-three feet enough of a variation to excuse European or American fluctuations of policy when attempts are made to agree on matters of trade, finance and world peace.—Christian Science Monitor.

SKIN BLEMISHES

Vanish Before Physician's
Prescription

Those spots or pimples on your face—why let them go on tormenting you? Like millions of others have done, you can get rid of your skin trouble through the work of a great physician—Dr. D. D. Dennis. Dr. Dennis' prescription—known in many countries as D.D.D. and now manufactured by Campana's Italian Balm chemists—will bring you relief at once, and quickly restore your skin to health. All druggists sell D.D.D. Trial size, 35c. Guaranteed to give instant relief or money refunded.

The Pony Express

Was Started In United States 75
Years Ago

Just seventy-five years ago the Pony Express, which used to carry mails in the United States, was started. The most famous of these services operated between San Francisco and New York. There were 80 of the finest horsemen and 400 hardy mustangs in the service. They worked in relays of 80 to 90 miles each, and covered the transcontinental journey in nine days.

Evidently He Knew

The teacher asked whether any one could give her a good definition of toast. Only one hand went up.

"All right, John, you tell us about toast."

"Toast," said John confidently, "is burnt bread scraped."

The remarkable thing about family pride is that people can be proud of so little.

The less a man boasts the more true worth he possesses. 2091.

Little Helps For This Week

"He that is slow to anger is better than the mighty, and he that ruleth his spirit than he that taketh a city." Proverbs 16:32.

Purge from our hearts and strains so deep and foul,
Of wrath, and pride, and care;
Send Thine own holy calm upon the soul,
And bid it settle there.

Let this truth be present to thee in the excitement of anger—that to be moved by passion is not manly, but that mildness and gentleness, as they are more agreeable to human nature, so also are they more manly. For in the same degree in which a man's mind is nearer to freedom from all passion, in the same degree also it is nearer to strength.

It is no great matter to associate with the good and gentle, for this is naturally pleasing to all, and everyone enjoyeth peace and loveth those best who agree with him. But to be able to live peaceably with hard and perverse persons, or with the disorderly, or with such as go contrary to us, is a great grace, and a most commendable manly thing.

The True Optimist

One Who Faces Difficulties And Tries
To Overcome Them

"The true optimists of life are not those who have always had things easy, and know nothing of care or trouble; neither are they the ones who resolutely refuse to acknowledge the presence of sin and sorrow. They are those who determine to meet facts honestly and can give themselves eagerly, untiringly, to fighting the sin and lessening the sorrow and the pain."

HAVE YOU Digestive Troubles?

Dr. Pierce's Golden Medical Discovery I was able to eat, gained in weight and resumed my work. All druggists.

Italians Dislike Radio

Get More Pleasure Out Of Talking
Than Listening

Out of 43,000,000 in Italy only 395,000 own radio sets. Even Austria with a bare 6,000,000 population claims to have 506,000 sets. Character of Italian tastes, illogical taxation, commercial ineptitude, poor programs and irksome police control are blamed. First and foremost, the people spend much of their leisure in cafes, bars, hotels, restaurants and being voluble they find in a radio a competitor who can be neither reasoned with nor bawled to silence.

Madame Marie Curie was the first person to receive the Nobel prize twice; she received it in 1903, with her husband, for physics, and again in 1911 for chemistry.

SWEARS TO TRUTH OF STATEMENT

Mr. Sam Sansone, 44 Front Street, Toronto, tells in a sworn statement how Fruit-a-Tives brought lasting relief after he had suffered badly from indigestion. He wants other sufferers to be helped as he was. That is why he gives a statement of his experience. And in order that everyone may be convinced of its absolute truth Mr. Sansone made his statement under oath before a notary. In part, it reads:—"For a long time I suffered badly from indigestion. I tried everything but I continued to get worse. A friend of mine recommended Fruit-a-Tives. After taking them, it was not long before I was entirely well and could eat anything without pain or after effects."

Copy of Mr. Sansone's complete sworn statement will be sent on request. Write Fruit-a-Tives Limited, Ottawa, Canada. FRUIT-A-TIVES—25c and 50c EVERYWHERE

Mr. Joe Hunter is plowing with his tractor for Mr. John Topley.

Recommendation That Regal & Wisconsin No. 38 Be Barred From Malting Grades.

At the recent meetings of the Grain Research Committee held in Winnipeg a recommendation went forward to the Board of Grain Commissioners that the smooth-awn barleys at present licensed for sale be classed as feed-barleys and kept out of the malting grades 1CW, 2CW and of 3-Extra 6-row.

Malting tests made at the Malting Laboratory, Manitoba Agricultural College, which is operated jointly by the University of Manitoba and the Federal Department of Agriculture, show that the Wisconsin No. 38 is much lower in malt-extract than O.A.C. No. 21, which is taken as the standard in the 3-Extra Grade. Regal malt is slightly lower in malt-extract than O.A.C. No. 21. The diastase content is very important in the manufacture of medicinal malt-extract. Diastase is responsible for changing the starches of the malt into barley-sugars.

Local maltsters have reported that smooth-awn barleys are not suited to their wants because of the fact that the hull peels off very easily during threshing and later on during the manufacturing process.

Farmers who wish to grow malting barleys during the coming summer would be well-advised to avoid using smooth-awn barleys. O.A.C. No. 21 is considered as the most satisfactory malting barley for both domestic and export trade.

BORN

On Tuesday, April 16th, 1935, to Mr. and Mrs. Allan S. Gole, a daughter.

Musical and literary England, and the England of the great cathedrals will be visited this summer by a party under the leadership of Dr. Alfred Whitehead, organist of Christ Church Cathedral, Montreal. Itinerary of the tour which will take about a month has been arranged by Guy Tombs, Ltd., in conjunction with the Canadian Pacific Steamships.

Had the same research been put into other industries as has been employed in the automobile business, you would not hear so much to-day about the high cost of living, said Col. Frank Chappell, of General Motors, Ltd., speaking at a lunch at the Lord Nelson Hotel, Halifax, recently.
